

# West Midlands Schools of Anaesthesia

## Professional Development for Post-Fellowship Trainees in the West Midlands

### PROGRAMME 2024

A series of study days / workshops on 'Development of Professional Knowledge, Skills and Attitudes' for Post-Fellowship Trainees in the West Midlands.

This programme is a joint venture between the three West Midlands Schools of Anaesthesia. The Course Director is Dr Catherine Brennan, Head of School for Anaesthetics, ICM and ACCS West Midlands. The programme has been specifically designed to meet the Royal College of Anaesthetists curriculum requirements for Stage 3 Training in Anaesthesia (Post-Fellowship). As this is part of the curriculum for Senior Trainees, all Trainees are strongly encouraged to have covered all modules at some time during the last two years of their CCT training either by attending this course or by completing these modules elsewhere. Evidence of development of Stage 3 generic professional capabilities will be sought at the Exit ARCP.

The programme comprises a series of seminars covering a range of management topics. Its purpose is to assist in preparing participants for the challenges of management to be found in a first Consultant appointment.

These Courses are funded by the West Midlands Deanery. You must quote your Deanery Training Reference Number on the Application Form for Study Leave Budget purposes.

***Please note that we try to provide these courses Face to Face and have booked venues accordingly, however due to speaker or venue restrictions it may be necessary at times to provide these virtually. Face to Face or Online is noted below.***
